

Dear Hiring Manager or Admissions Committee,

My name is Angel Avila, and I am currently a high school student interested in building a successful future through education, hard work, and leadership opportunities. I am writing this letter to introduce myself and share more about my skills, experiences, and career goals. I take pride in being reliable, calm under pressure, and easy to communicate with, which helps me work well with others and stay focused on my responsibilities.

One of my strongest skills is technology and web development. I have experience using HTML, CSS, GitHub, Git, Netlify, Adobe Photoshop, and Terminal tools. I also have typing skills of 49 words per minute. These skills have helped me become more organized, detail-oriented, and creative when working on projects. In school, I always try to complete my work responsibly and stay committed to improving my knowledge and abilities.

Outside of academics, I completed 22 hours of community service volunteering at the Huron Elementary Library. This experience taught me the importance of helping others, being patient, and contributing positively to my community. Although I have not yet participated in clubs or sports, I continue looking for opportunities to grow as a student and future professional. I am especially interested in careers in criminology and law enforcement, including becoming a Sheriff, California Highway Patrol officer, or Correctional Officer.

After high school, I plan to attend college and major in Criminology. Some of the colleges I hope to apply to include California State University, Fresno, California Polytechnic State University, and San Diego State University. My main college I would like to get in is Fresno State. My goal is to continue building leadership skills, gain experience in criminal justice, and create a successful career where I can help and protect my community.

Thank you for taking the time to read my letter of introduction. I appreciate the opportunity to share more about myself, and I look forward to future educational and career opportunities.

Sincerely,
Angel Avila
